FRECKLES

Don't Hide Them with a Veil; Remove Them with the Othine Prescription

This prescription for the removal of freckles was written by a prominent physician and is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold by any druggist under guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely.

Be sure to ask the druggist for the double strength othine; it is this that is sold on the money-back guarantee.—Adv.

PARALYSIS EXPERTS MEET

Prevention and Cure Is Now the Object Sought by Authorities

DR. FLEXNER HAS FOUND GERM

Health Expert Says — Dr. Shaw Fears Epidemic Will Grow Worse

New York, July 14.—New York City health officers said yesterday that they were doing their best to prevent the spread of infantile paralysis from this city to other communities. Residents of infected districts have been warned that they will encounter stern quarantine measures if they leave the city. Out of town health authorities have been asked to report any persons arriving from infected areas in New York City. To enable other towns and cities to do this the local board of health is distributing broadcast lists of addresses where cases of the disease have been found here.

The New Jersey state health department Wednesday night reported the total number of cases in the state as sixty, with eleven new cases for the day. The state health department has announced that it would not declare a quarantine against New York City but would leave that to the local boards. From the office of the attorney general of New Jersey came an opinion that the state cannot keep out children under fourteen years of age if they are healthy.

Many of the New Jersey towns nearest New York, however, have not hesitated to turn back children, not only those who came from New York, but those from other places. At Edgewater, Manhattan, the police not only guarded the New York ferry, but established a motor boat patrol to prevent children from crossing the river in other craft.

In Connecticut and New York state towns immediately north of this city, health and police officers are meeting all incoming trains and trolley cars and even stopping automobiles and turning back all children under sixteen.

A Conference of Experts.

Mayor Mitchell, local health authorities and eminent physicians who are co-operating with them, believe that every known physical precaution has been taken to check the epidemic. The physicians now will concentrate their attention upon laboratory work in an effort to isolate the germ of the disease and find a preventive or cure. In this connection there was great interest in a meeting held in the rooms of the New York Academy of Medicine last night, at which papers were read by experts on infantile paralysis. Questioned about a report that a New York physician had discovered the germ of the disease, Health Commissioner Emerson replied: "If anyone knows more about that than Dr. Simon Flexner of the Rockefeller institute it's news to me, and I believe that I would have had a tip before now."

PLAINFIELD

Ivan Hunt was quite badly bruised and cut about the face Tuesday when, as he was coming down to the village on his bicycle, his brake failed to work, and when he met a team and turned out for it he got out too far. In trying to get back into the road, he got into some sand and was thrown from his wheel, striking on his head and rendering him unconscious. Dr. Hodgdon was called and the boy was taken to the home of his mother. No bones were broken, but his face was cut in several places. The failure of his brake to work seems to have been the principle cause of the accident.

Over a year and a half ago "The Players" from Barre presented a tabloid version of "Tempest and Sunshine" in Plainfield. To-morrow night the Nellie Gill Players will present the complete version of the same play. Mr. Smith and Miss Butler will be seen in the novel guise of black-face comedians. Dancing—adv.

MAKING CHILDREN EAT

Nothing is ever gained by forcing a child to eat when it refuses food. Make sure that nothing is being eaten between meals to destroy the natural appetite and if your growing child does not have a healthy craving for good, honest food at mealtimes there is something the matter. Threats of punishment if the child does not eat will not correct the difficulty.

A fitful appetite in a growing child, especially if the patient is pale, languid, nervous, irritable, and without ambition, usually means that the blood is thin. A non-alcoholic tonic such as Dr. Williams' Pink Pills is demanded. During her teens a girl lays the foundation for her future health. Lack of blood at this time may rob her of robust, healthy womanhood. It is of the greatest importance to administer to girls who grow pale and weak a safe tonic and Dr. Williams' Pink Pills meet every requirement of the most careful mother. They make the blood rich and red and it carries renewed health and strength to every part of the body.

Your own druggist sells Dr. Williams' Pink Pills. Send today to the Dr. Williams Medicine Co., Schenectady, N. Y., for the book, "Building Up the Blood." It is free.
